New Funding Opportunity for Small Businesses

Do you own a small or medium-sized Canadian business and are looking to expand your Digital Technology? The Canada Digital Adoption Program may be right for you!

Get started on your application today for a chance to receive a grant to develop a digital plan tailored to your business's needs.

Click here for more info!

NEOnet currently has a funding opportunity that is available to small-medium businesses in your service area. The Broadband Internet for Remote Areas (BIRA) grant program, is available to all SME's Northern Ontario within the NOHFC boundary.

Today's contemporary economy relies heavily on a firm adaptation of modern means of communications, production methods and management strategies, all supported by Information Communication Technology (ICT). The BIRA project will assist companies to obtain broadband services currently unavailable to them, in order to remain competitive in today's marketplace.

This non-repayable grant opportunity reimburses eligible applicants 50% (up to a maximum of $1,500.00) towards the purchase of hardware, installation, labour fees and shipping towards upgraded or new broadband or satellite internet.

In this package, we have included postcards to pass along to clients and an information package in both French and English. Below is a Dropbox link for digital materials that we hope that you can share with your stakeholders. These documents can be downloaded and shared within your network.
